

AP2200C

The Aqua-Pure AP2200C twin undersink water filter system is designed to protect your family from parasitic cysts like cryptosporidium, giardia and other hazardous contaminants.

**“Safe, sparkling clean,
fresh tasting water on tap”**

Unlimited safe, sparkling clean, fresh tasting filtered water is always available on demand from the dedicated faucet for drinking, food preparation and cooking for around 2 cents a litre.

**“No more carrying expensive bottled
water from the supermarket”**

Not only will you enjoy the pleasure and taste of filtered drinking water, but you will also appreciate the true flavours of coffee, tea and all other water-produced beverages.

Genuine components

To maintain the high level of performance and protection provided by the Aqua-Pure AP2200C water filter system, we recommend a maximum cartridge life of 12 months and that you only use Aqua-Pure replacement cartridges.

The life and performance of cartridges may vary, depending on the volume and quality of water being filtered.

Aqua-Pure®
WATER PURIFIERS

**twin undersink
water filter system**

3year
warranty

faucet included

**Safe, sparkling clean and fresh tasting water
for around 2 cents a litre**

features

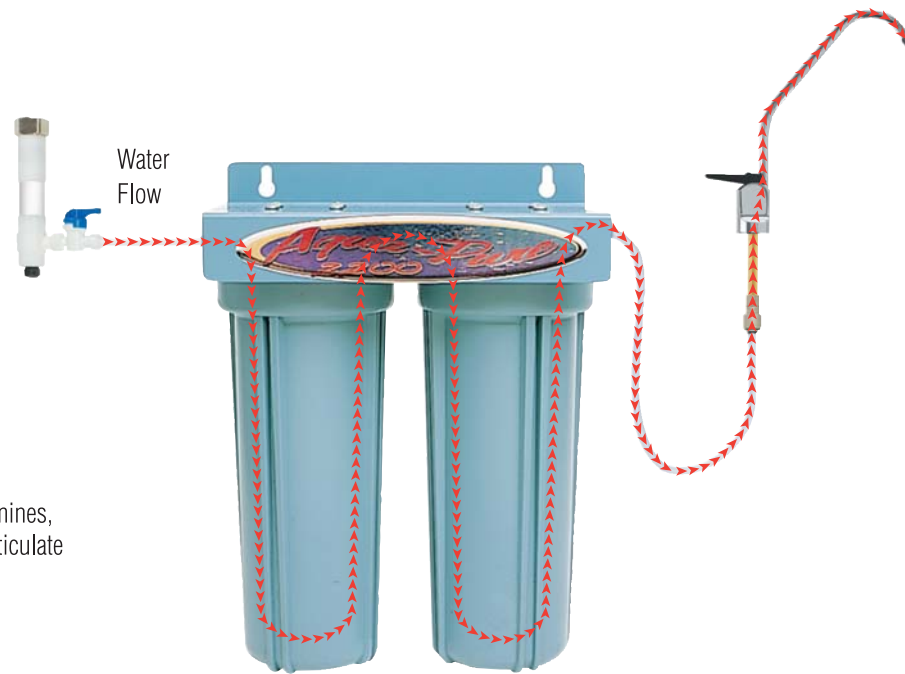

- Neat, compact and versatile design
- Easy cartridge replacement and upgrading for specific contaminant protection
- Simple and quick Installation
- Supplied complete with all necessary plumbing fittings for installation
- Manufactured in Australia with Australian Standards approved components

benefits

- Reduces offensive tastes and odours - chlorine, chloramines, sediment, organic matter, algae, dirt, rust and other particulate contaminants down to 0.5 micron in size
- Protection from organic chemicals - such as pesticides and herbicides
- Protection from parasitic cysts - cryptosporidium and giardia
- Safe, sparkling clean and fresh tasting water for around 2 cents a litre

Additionally, the Aqua-Pure AP2200C water filter system installation is made easy with the Aqua-Pure multi-function control valve that provides:-

- Dual check/back flow prevention
- Pressure limiting protection
- Anti hammer protection
- Flow restriction

This compact unit only requires a space of approximately 300mm wide, 400mm high and 135mm deep. All necessary fixing hardware is supplied.

Dual filters for even better results

Pre filter - AP110 High quality commercial duty cartridge.

Provides 3 times the life of comparable cartridges. This high quality commercial duty cartridge is of rigid construction preventing unloading or passing. The graded density design and grooved surface increases dirt holding efficiency and capacity, providing up to 3 times the life of comparable cartridges. Removes and reduces turbidity, algae, sediment, dirt, rust and particulate contaminants down to 5 micron in size.

Post filter - AP187-1 Safeguard multi purpose premium carbon block.

Removes 99.95% of cysts. This SafeGuard multi-purpose premium carbon block cartridge provides protection from cryptosporidium, giardia and other filterable cysts, while also removing or reducing offensive tastes, odours, chlorine, organic chemicals such as herbicides and pesticides, sediment, turbidity, organic matter and all other particulate contaminants down to 0.5 micron in size.

Optional post filter - Optional AP117R high performance commercial duty cartridge.

Long life, 3 stage granulated activated carbon taste and odour cartridge. This is a high performance, commercial duty, long life granular activated carbon, taste and odour cartridge. This cartridge provides the option of modifying the AP2200C from cyst protection to a taste and odour system. The AP2200C can also be modified to provide protection from specific contaminants for your individual requirement, by installing the appropriate Aqua-Pure replacement cartridge.
